

History

Who, when and how

Founded in May 2001,

ATU was for its founding members

an answer to the question:

"We have some distinctive competent,

What we could do to use these competent

otherwise than in private firms planning (very few)

or architecture (many, but too little concerned)

of integrated urban development ?"

They then followed a series of meetings to negotiate and formulate STATUS.

On the way, alongside the founders we have won and members associates. Thus was

formed an interdisciplinary team of young professionals interested in city issues:

architects, urban planning, engineers, economists, lawyers, sociologists.

Honorary members are those who have supported us from the outset and who have

supported us with good advice in time.
